

# EVA-LAST®

INSPIRED BY NATURE, DESIGNED FOR LIFE.

Intertek

## Infinity® IS

## CAPPED COMPOSITE DECKING

Infinity® IS combines all the benefits of Infinity® composite with the advantages of I-Series™ to give you the ultimate in durable, low-maintenance, eco-friendly decking, with a highly resilient cap for protection against decay, weather, stains, and slipping, with streaked colour variation for the look of timber. The smart I-beam design creates a cost-effective and lightweight board that uses less material to save on transportation, substructure, and labour, yet maintains span capabilities and allows for more efficient installation.

### UNIQUE BENEFITS

DURABLE

PROTECTIVE CAP

LOW-MAINTENANCE

DECAY RESISTANT

STAIN RESISTANT

COST-EFFECTIVE

LIGHTWEIGHT

SPAN

INSTALLATION

A PRODUCT BY

**EVA-LAST®**

# LIGHTWEIGHT, CAPPED COMPOSITE DECKING

**Capping material:**  
Engineered polymer

**Core material:**  
Bamboo  
PE composite

## I-SERIES™ COST BENEFITS

I-Series™ boards perform better while using less material (and creating less waste) than solid composite profiles and traditional timber. This revolutionary decking range has a lighter weight but maintains span capacity in line with other composite boards, making transportation, handling and installation faster and easier.

- Reduced decking material cost
- Reduced installation time (and cost)
- Reduced cost of substructure
- Reduced cost of fixtures and fittings (span of 450 mm on joist centres)

**I-Series™**

**FAMILY OF PROFILES**

**PATENTED TECHNOLOGY**

**I-SERIES™ GROOVED board**  
135 x 25.4 mm (5.4 m lengths)  
2.84 kg / m

**I-SERIES™ STARTER board**  
135 x 25.4 mm (5.4 m lengths)  
2.84 kg / m

Scan to view the Infinity Installation Guide

I-Series™ decking and trim boards are fastened using HULK hidden fastener clips and screws.

## I-Series™ INSTALLATION AND USAGE BENEFITS

**Improved heat dissipation**  
The I-Series family of profiles has a unique design that dissipates heat more efficiently and allows the board to cool at a much faster rate when compared to hollow and solid decking profiles.

**Drains - cannot trap water**  
The I-Series family of profiles is specially designed to eliminate trapped water and its negative effects. The open space between the "feet" of the board allow water to travel.

**Rips straighter**  
The balanced nature of I-Series profile extrusion creates a board that is less susceptible to bowing, warping, splitting, splintering or cracking - even when "ripped".

**Lighter to move on site**  
The lower mass per board makes I-Series lighter weight than other composites or wooden boards. This, in turn, makes it easier to transport and easier to install.
